SUMMARY

I am a first-year B.Tech student in Electronic VLSI Design and Technology at Jamia Millia Islamia, currently learning C++ & Network Theory. I have skills in programming C and web development (HTML, CSS, JavaScript, Basic Understanding of Backend) and know how to use Git and GitHub. I am eager to learn, work with others, and contribute to the IEEE community to grow my knowledge and skills.

TECHNICAL SKILLS

- Programming Languages: **C, C++**
- Web Development: **HTML, CSS, JavaScript**
- Version Control: **Git, GitHub**
- Tools: **Visual Studio Code, Git Bash**

PROJECTS

DIGITAL TECHNOLOGY AGENCY
- I developed a modern landing page for a Digital Technology Agency, focused on showcasing the agency's services, portfolio, and client testimonials. The project highlights my skills in frontend development, with a design that emphasizes user experience and visual appeal. I utilized HTML, CSS, and JavaScript to create a seamless, interactive interface. The landing page is optimized for performance across various devices and browsers, ensuring a consistent and engaging user experience.

CALCIFY (Active)
- Comprehensive Calculator Suite A dynamic calculator suite featuring basic and advanced calculations, a currency converter including INR, and a BMI calculator. Experience smooth interactions with Cube Swiper.js for a sleek, interactive design.

EDUCATION

B.Tech in Electronic VLSI Design and Technology
Jamia Millia Islamia, New Delhi
2024 – Present

12th Grade (CBSE)
R.K. Modern Sr. Sec. School, Noida
Scored: 88%

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Urdu
- **Certifications:** Programming in C by UDEMY.
